The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/22/08 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings were received on 9/13/04. These drawings are acceptable.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1, 2, 6-9, 11, 13-15, 19, 20, 24-27, 29, 32, 33, 37-43, and 54-84 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kalevo et al (WO 98/41025).

Response to Arguments

6. Applicant's arguments filed 12/22/08 have been fully considered but they are not persuasive. Applicant asserts on pages 13-15 of the Remarks that Figure 3 of Kalevo et al fails to

Art Unit: 2621

disclose at least one parameter of the filtering operation is determined based on the types of the prediction encoding methods. However, it is noted in applicant's analysis of Figure 3, applicant fails to recognize that the decoded frame from 15 is not stored into the frame memory 16.

Rather, Kalevo et al discloses applicant's claimed filtering process 33 prior to the storage. Thus, the filtering operation, and its parameters used, is an integral part of the prediction encoding method.

Applicant also asserts on page 16 of the Remarks that Kalevo et al fails to disclose truncating pixels. However, Equation 2 of Kalevo et al discloses the concept of such common truncation technique wherein n is limited between 0 and 6.

Applicant further asserts in Section 2.3 that Kalevo et al fails to disclose a filter according the block types. However, the abstract and the background sections of Kalevo et al discloses the concept of such common coding of blocks wherein the coding method may be intracoding (or interceding).

Applicant finally asserts on page 17 of the Remarks that Kalevo et al fails to disclose performing a filtering operation on a block boundary. However, Figure 2 of Kalevo et al illustrates the concept of such common filtering operation on block boundary 30.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (571) 272-7334. The examiner can normally be reached on (571) 272-7334.

Art Unit: 2621

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
